

UZP Enzymatic Treatment

Premium industrial strength universal enzyme product, trillions not billions of beneficial bacteria, enzymes & nutrients per pound, super concentrated formula is multiple times stronger than competing products. The gold standard of enzymatic treatments look for the gold bag.

Initial Dose Chart

Trap Size	UZP Enzymatic Treatment	Water
Up to 20 gallons (75 liters)	114 grams (4 oz.)	945ml (1/4 gallon)
20 – 40 gallons (75 – 152 liters)	171 grams (6 oz.)	945ml (1/4 gallon)
40 – 100 gallons (152 – 379 liters)	227 grams (8 oz.)	3.8 liters (1gallon)
100 – 500 gallons (379 – 1893 liters)	454 grams (16 oz.)	7.6 liters (2 gallons)
500 – 1000 gallons (1893 – 3785 liters)	568 grams (20 oz.)	7.6 liters (2 gallons)

For each additional 500 gallons (1895 liters, or 1.9 m3) of trap capacity add an additional 114 grams (4 oz.) of product with 2 liters (.53 gallon) of warm water. Initial application is the only time adding product directly into the trap is required. After initial treatment, weekly maintenance applications maintain viable strains of microbes active within the trap. Therefore maintenance applications can be done by adding directly to all openings / drain lines discharging into the grease trap.

Avoid using bleach or other chemicals that can kill the bacteria and enzymes. Always use warm water to mix the product before applying it.
